EDUCATION

Savitribai Phule University **Pune, Maharashtra**
B.E in Computer Science (8.50/10 SGPA) *Expected Graduation, May 2026*

- **Related Coursework:** Web Development, Python, Machine Learning, Software Testing and Quality Assurance, Operating Systems, Data Structures & Algorithms.

PROJECTS

Car Accident Detection Security System **Repo Link | Live**
Developer *April 24*

- Built a machine learning system that uses CCTV footage to automatically detect car accidents.
- Integrated real-time alert functionality to notify emergency services like police and ambulance for quick response.

Company Profile Website **Repo Link | Live**
Developer(Personal Project) *March 25*

- Developed a responsive company profile website using Django for the backend and Bootstrap for the frontend.
- Implemented dynamic content management, easy navigation, and a modern, user-friendly interface to improve the user experience.

MDM-Connect **Repo Link | Live**
Developer(Final Year Project) *In Progress*

- Created a secure web application for the Mid Day Meal Scheme. This app allows real-time digital payments and fund management for schools using the Polygon network.
- Built user-friendly dashboards for managing devices, tracking transactions, and providing public access to school funding data. This improves transparency and accountability.

Breathe-Safe **Repo Link | Live**
Developer *Feb 26*

- Developed a full-stack web application for AQI monitoring, which is integrated with a custom-designed IoT-based hardware component named "Travel Buddy" for real-time air quality monitoring.
- Implemented AI-driven insights and health suggestions to enable users to understand air quality patterns and make informed decisions about the air they breathe.

ACTIVITIES AND LEADERSHIP

Hackathon Participant (Leader)

- Led teams in multiple hackathons, including:
  I. **INNOVATE MITCORER HACKATHON** – Designed and developed a health monitoring web application that tracks users' daily health through interactive questions. Certificate
  II. **AGNETHON Vashi, Mumbai** – Got Selected for the offline round and designed a website for Mid-Day Meal Government Transactions Transparency using Blockchain and Web3. Certificate
  III. **INNOVATE YOU HACKATHON 2.0 , Pune** – Developed a real-time, map-based air pollution monitoring system that visualizes live air quality data for better environmental tracking and public awareness. We were very close to winning an award. Certificate
- Managed team coordination, task distribution, and project presentations under tight deadlines.
- Gained practical experience in collaborative software development, rapid prototyping, and effective communication under pressure.

Co-Technical Head, ACES Community

- Serving as Co-Technical Head in my college community to promote technical excellence.

SKILLS

Programming : Python, C++, PHP, HTML, CSS, JavaScript, MySQL, Django, Firebase, Machine Learning, YOLO v5/v7, OpenCV, Git, GitHub, Blockchain, MetaMask,Data Science, Python Libraries, React.js, Bootstrap, Tailwind, Render, Vercel, Problem Solving, Communication, Programming Languages, Quick Learner.

CERTIFICATIONS

I. Python 101 For Data Science, A course of study offered by IBM. Certificate
II. Full Stack Web Development and AI with Python (Django), Udemy. Certificate
III. Data Science Course, codewithharry.com. Certificate
